### Responses

What do you like most  
about this course? -

A

- that the professor simplifies the information.
- Nothing really, other than the fact it was on Zoom
- The professor use of examples and how polite and respectful she is overall a great class
- n/a
- i enjoyed that she made the mathematical part of business doable which I really appreciate.
- online, tests and study guides very similar, enjoyed this class very much
- I like how well she explains things and goes over multiple examples so we fully understand what we are doing.
- The Zoom lectures are recorded and are accessible anytime which is very helpful.
- how simply and effective her teaching is
- I like how the homework was set up. The problems related very well to what we were learning and I felt it prepared me for tests
- I enjoyed the personal feel of the class. My instructor was clear, and kind, and showed to be knowledgeable of the information being presented. What I liked most was how clear and understanding the material was and how it was presented to be understanding. I also really liked how when questions would be asked my professor was more than willing to help and I never felt dumb for asking for help.

What suggestions do you have to improve this course? -

A

- There is not anything I feel needs to be improved. Everything in my personal view was clear and to the point.
  - None
  - Nothing, it was perfect
  - I have no suggestions, I think a summer course will always be fast-paced, but this course has been manageable.
  - N/A
  - n/a
  - No notes. hws were helpful and not busy assignments and the exam review was also very useful and to the point and the study guides were informative. if anything I would suggest more examples in the study guide and when there is a problem I would restate the equation we learned and not just showing what numbers go where so visually you can see how the equation fits without having to go back and check which equation was used.
  - n/a
  - none
  - More interactive, more enthusiasm from professor. She's sweet but it was incredibly boring.
  - Create a practice exam with more questions, so students know exactly what to prepare for (just because the exam is a huge portion of the grade).
